

PBE Group Company Overview

SAFETY · DATA & COMMUNICATIONS · POWER technology and infrastructure in harsh environments for 50 years

PBE Technology

PBE offers a suite of proprietary safety, data and communication products and systems that create an integrated Internet of Things (IoT) solution for use in harsh environments.

PBE Technology manufacturers over 70 proprietary products, meeting global regulations in the mining, tunnelling and construction industries. Solutions include data and voice communications infrastructure, environmental monitoring, vehicle collision avoidance and proximity detection, tracking, emergency alerting systems, ventilation on demand and fleet management.

PBE Power

PBE Power designs, integrates, installs and services temporary and permanent high voltage equipment and infrastructure to the tunnelling and construction industries on a sale or rental basis.

In addition, PBE Power (Projects) provides permanent power infrastructure for mines. PBE's electrical power distribution equipment for construction projects include substations, switchrooms, distribution boards, HV cables, transformers etc. PBE Power also maintains a fleet of 1,200+ rental assets across global locations.

PBE Mine Services

PBE Mine Services is an electrical services business for the Australian mining industry, specialising in the design and manufacture, testing, repair and refurbishment of low to high voltage electrical cables and couplers.

In addition, Mine Services provides flameproof and non-flameproof equipment such as substations, switchrooms, distribution control boards, auxiliary fans etc. for the Australian coal and hard rock markets. PBE equipment is offered on a sale or rental basis with flexible terms.

PBE Group ("PBE") provide an adaptive and flexible integrated solution where a reliance on safety and productivity is essential.

PBE are a true global systems provider for the mining, tunnelling, construction and associated markets. Our specialised engineering team integrates our industry specific manufactured products and best in class 3rd party products to ensure a sophisticated, robust and commercially viable solution.

Our growth in international markets is based on the key verticals of Technology, Power and Service Delivery – fundamental in any industrial project. Our experience in confined space and underground construction has enabled PBE to complete over 850 projects in more than 60 countries with 320 staff and 18 regional offices.
